3rd Quarter Update

Welcome to our latest product development!

Introducing The Percy's Fun Food Range, with the initial launch of our popcorn products both bulk and pre-packed tubs of popcorn will soon be joined by flying saucers & marshmallow. This new Percy's brand is an exciting new direction for GreenCo Food2go and is a superb complimentary offering to our existing product range!

It's Percy's Poppin' Corn **Proud to be made in the Midlands!**

In America the native red indians first discovered that throwing maize seeds on to an open fire produced popcorn, but things have certainly moved on, and now this amazing poppin' corn is bought to you by Percy!

As recommended by several health and medical organizations popcorn, which has been properly prepared, is one of the healthiest snack foods you can eat. Popcorn is low in calories and contains energy-producing carbohydrates.

Popcorn is high in bulk and fibre, providing roughage the body needs in the daily diet. The National Cancer Institute of the USA suggests fibre in the diet to reduce the risk of some forms of cancer.

Percy's Popcorn is unrivalled in the service and support we can offer to all clients large or small.

We offer pre-popped sweet or salted popcorn in bulk packs and can also provide free on loan warmers (subject to contract) We also offer pre-packed popcorn in handy 1 Litre tubs, in toffee and cinema sweet flavours. (we can also provide own branded tubs for promotions or to assist in enhancing brand identity, subject to quantities and agreement)
